	SD215	78.692793	per unit						

\* Consolidated Rates include all portion amounts broken out in shaded area.

### **How do I determine which figures to use in calculating my Taxes?**

- ~ Consult the latest Final Assessment Roll listing for your property. You will want to note the Fire District code, Lighting District code and any Water and/or Sewer District codes (and the number of units listed for the Water/Sewer districts).
- ~ On the rate chart use the "Inside" figures if you are in the Village limits.
- ~ Use the "Outside" figures if you are not in the Village limits and there are no Special District Codes listed.
- ~ All other properties will need to find the rate line that is correct for their Fire/Lighting districts.
  - \*Note that not all properties with a Fire District will have a Lighting District also.
- ~ Use the figures for any Water/Sewer Districts which may be applicable to your property. Most are a flat rate (per unit charge)
