Campville Fire Station

Please pre-register for clinics at:  
[www.health.ny.gov/go2clinic/54](http://www.health.ny.gov/go2clinic/54)  
Or Scan Below to go to registration!

In NYS all puppies and kittens must get their first rabies shot at 3 months, a booster shot one year after, and then every three years. Ferrets must get a shot every year. Bring rabies shot records to the clinic. Owners are responsible for their pets and any harm they cause.

## Rabies 101

- Rabies is deadly! It kills 100% of animals and humans that it infects. The virus is spread through an infected animal's saliva.
- Bats are rabies carriers in our area. If you wake up with a bat in your room, catch and submit it for testing, even if you don't think it bit you. Do not release it outside. Do not squish the brain.
- Wild animals are not pets. Raccoons, foxes, skunks and even stray cats and kittens can transmit rabies if they have been exposed. Do not touch or feed these animals.
- When in doubt, call Tioga County Public Health!
