WILDLIFE PACS

All stock 12-24" unless otherwise noted

BIRD/BUTTERFLY PAC – 2 each: Elderberry, Liatris Spicata, Ninebark, Butterfly bush (root) and Stella De Oro Daylily (root).	\$23/Pac		
NATIVE FLOWERING TREE & SHRUB PAC – 2 each: Eastern Redbud, Black chokeberry, Elderberry, Nannyberry, and Wh. Flowering dogwood	\$23/Pac		
ORNAMENTAL FLOWERING PAC –2 each: Butterfly Bush, Lilac, Ninebark Rose of Sharon, W.F. Dogwood	\$23/Pac		
WILDLIFE NUT TREE PAC – 2 each: White oak, Swamp White Oak, Pin Oak, Sawtooth oak and Red oak.	\$23/Pac		
HOMEOWNERS PAC – 10 Blue spruce, 2 Sugar maple, 2 Eastern Redbud 2 Shagbark Hickory, 2 Witch Hazel and 5 Austrian pine	\$25/Pac		SOLD OUT
POND HABITAT PAC (NEW) – 2 each: Red Osier Dogwood, Buttonbush, Willow Sycamore, River Birch	\$23/Pac		SOLD OUT

GROUND COVERS

LIATRIS SPICATA	10/\$16		
PACHYSANDRA	10/\$14 or 50/\$40		
DAYLILY, Stella De Oro (Heavy one fan division)	10/\$15		
HOSTA PAC – Ventricosa, Hyacinthina, Albo Marginata, F. Aureo Marginata, Hadspen	\$23/Pac		SOLD OUT

WILD FERNS and FLOWERS

FERN PAC-2 each of Cinnamon, Christmas, Ostrich, Maidenhair & New York	\$23/pac		
PERENNIAL FLOWER PAC-2 each: Dream Baby Daylily & Francis Fay daylily , Blue king iris, Snow queen iris, Stella De Oro Daylily	\$23/pac		

WILDLIFE BERRIES

BLUEBERRY – Blue ray, Mid-season, 5-12" rooted cutting	10/\$25.00		
BLACKBERRY, Darrow – 1-2' rooted cutting	10/\$28.00		SOLD OUT
RASPBERRY, Boyne – 9-15+'' rooted cutting	10/\$28.00		SOLD OUT
EDIBLE FRUIT PAC – 2 each Jersey blueberry, Blue Ray blueberry, Raspberry, blackberry, strawberry	\$35/pac

ORDERING EARLY HELPS INSURE THAT WE CAN SUPPLY THE SPECIES YOU WANT BUT YOU ARE STILL NOT GAURENTEED YOUR ORDER. WE WILL TRY OUR BEST TO COMPLETE EVERY ORDER

Stock for the Conservation Planting Program was ordered in October 2020 based on species and numbers sold over the last 2-3 years.

The District reserves the right to refund payment if species is unavailable

Generally we can obtain additional evergreen stock if demand exceeds our original order.

Deciduous species are more difficult to obtain if demand exceeds our original order.

Order large quantities, 100 or more, before March 2021 to better insure availability

Pick up dates are Friday April 16th and Saturday April 17th at Tioga County

Soil and Water Conservation,

183 Corporate Drive, Owego, NY 13827

Pick-up will be a drive-thru similar to last year. Choose your best pick up time above

Additional copies of this order form can be found on our website at

www.tiogacountyny.com/programs-agencies/soil-and-water/

SPECIES DESCRIPTIONS CAN ALSO BE FOUND

ON OUR WEBSITE

TIOGA COUNTY SOIL AND WATER CONSERVATION DISTRICT – 2021 TREE AND SHRUB PROGRAM

INFORMATION and SPECIES DESCRIPTIONS

The District reserves the right to offer substitutions or refund payment on species if unavailable. The District will NOT be responsible for the success or failure of plantings.

All species are bare rootstock. Evergreen seedlings have grown entirely in their original seedbed and are 3-0 stock, three years in the seedbed. Transplants have been transplanted from the seedbed to a transplant bed. This allows the plant to grow a denser root system, more branching and a thicker stem. Fraser fir are 3-2 transplants. This means 3 years in a seedbed and 2 years in a transplant bed. Northern white cedar & Spruces are 2-2 transplants. Canaan and Balsam Fir are 3-1 transplants. Deciduous seedlings are 1-0 or 2-0 stock.

EVERGREENS

AUSTRIAN PINE - Native to Europe. A tree that grows to a height of 50 feet. Grows well on a variety of soils. Needles are dark green, stiff, grow in clusters of two, and are from 3 to 6 inches long. It is a very attractive ornamental. It is an excellent windbreak because of its stiff branches.

WHITE PINE – Largest of the Northeast conifers. 80 to 100' in height. 3-5" long dark bluish green needles are slender and flexible. Can grow 2'+ per year on preferred sandy loam soil. Valuable softwood timber. Can be pruned for Christmas trees.

BLUE SPRUCE - Native to the Central Rocky Mountains. Needles are approximately 1 inch long and very sharp. It requires a more fertile, well-drained site than white spruce and prefers south and east slopes. It is used mostly as an ornamental and to a lesser degree, as a Christmas tree.

NORWAY SPRUCE - A native of Europe. Needles are dark green, ¾ to 1 inch long. Grows well on a variety of soils. However, the first five years of growth are very slow. It is not recommended for Christmas trees because the needles drop quickly. Used mostly for ornamentals and in windbreaks.

WHITE SPRUCE - Native to northern New York and Canada. Grows well on a variety of soils. Needles are short 1/3 to ¾ inches long, and somewhat blue-green in color. When open grown as an ornamental it develops a handsome conical growth, which extends nearly to the ground. Used as Christmas trees, in windbreaks, and as ornamentals.

NORTHERN WHITE CEDAR - Leaves are yellow/green in color. Young leaves on new shoots are ½ inch long and pointed. Leaves on lateral branches are flattened and scale-like. Grows on a wide variety of soils from very wet to very dry.

CONCOLOR FIR - Also called White Fir. It is a native of the western US. It grows well on both dry and wet sites. Needles are yellow/green but have a bluish cast in the first few months of growth. Needles are 1 to 3 inches long. It tolerates shade well and is excellent as an ornamental or a Christmas tree. Caution: It has a very deep taproot, plant only on deep soils. It is also very susceptible to late spring frosts, plant only on higher elevations.

BLACK HILLS SPRUCE – Native to South Dakota. Another variety of the white spruce but some experts say it's ornamentally superior to the standard white spruce. Grows to a height of 30-60' in full sun or partial shade. Grows best in acidic,

moist, gravelly, loam, or fine clay soils. Makes a nice windbreak

FRASER FIR - Native to the Appalachian Mountains. Needles are 1/2 to 1 inch long, dark green above and silvery white beneath, and crowded on the upper side of the twig. It's an excellent Christmas tree, a fast grower when young, and grows to a height of 30 to 40 feet. Likes well drained cool, moist soil. Prefers north and east slopes. Least affected by late spring frosts. Does poorly on hot, dry sites. May not survive extreme droughty conditions.

CANAAN FIR- Native to isolated pockets in West Virginia. Similar to both Fraser and Balsam fir. Will tolerate wetter soils and resistant to spring frost. 40- 55ft high. Best grown in deep, well drained loam with ample moisture.

DECIDUOUS

EASTERN REDBUD – Known as the harbinger of spring. Tree is considered a flowering and ornamental tree growing to a height of 20-30' and a spread of 25 – 35'. Begins flowering at a young age (~4 years) with rosy pink flowers in April. Full sun or partial shade and grows well in most soils.

TULIP TREE – Also called a yellow poplar. Noted for its tulip like flowers that are yellow with an orange band at the base. Flowers are followed by long, oblong, brown shaped fruits. 60 to 90' in height and a 30 to 50' spread. Full sun to partial shade. Grows best in moist, organically rich well drained soils.

DOMESTIC APPLE - Common apple variety. Full size apple tree will produce fruit 1½ -2½" in diameter. Deer and other wildlife will eat fruit.

RIVER BIRCH- Naturally grown on riverbanks but can be grown just about anywhere. 40-70' height. Fast growing. Full sun to partial shade is best. Good erosion control

BUTTON BUSH – Deciduous shrub. 6-12' in height. Grows well in wet soils. Very easy to grow with minimal maintenance. Excellent for wildlife. Full sun to part shade is best.

BLACK CHERRY - Highly valued timber tree growing 60-70 ft. Small cherries are used by wildlife.

BLACK TUPELO – Great landscaping tree with vibrant fall colors. Grows to a height of 30-50' and a spread of 20-30'. Full sun to partial shade are best. Provides fruit for birds and nutrition for bees in late spring.

SHAGBARK HICKORY- 60'-80'. Bark hangs in long strips on older trees. Edible nut in thick green husk. Thrives in full sun and rich, well drained loam.

RED OSIER DOGWOOD – 7-9' erect shrub with dark red winter stems. Yellowish white flowers in May. Full sun to partial shade. Prefers wet soils. Birds are very attracted to the fruit and for shelter. Good for erosion control

AMERICAN HAZELNUT- or Filbert. Multi stemmed shrub growing 15-18' high. Annual abundant sweet nuts. Plant multiples to ensure pollination. Full sun to partial shade with well-drained soil. Drought tolerant

AMERICAN ELDERBERRY – 10-15' high. Full sun to part shade. Moist well drained soil. Great for wildlife, jams, preserves, tinctures, and more.

WITCH HAZEL – 10-30' height. Pest and disease resistant. Bright yellow fragrant flowers at about 6 years old. Prefers north facing slopes with semi shaded habitats. Regular watering required

SILKY DOGWOOD – Grows 8' high and 8' wide. Full sun to to part and grows well in a wide range of

moist soils. Found along ponds, lakes, swamps, streams. Fruit is loved by birds and waterfowl

SWAMP WHITE OAK – Grows to 60-80' as a nice shade tree. Typically grows on hydromorphic acidic soils in low lands by streams, ponds, etc. Great tree for wildlife with acorns dropping in the fall.

RED OAK - A fast growing oak, develops a short massive trunk when grown in the open. Produces acorns at 2-5 year intervals when mature. Grows 60-80 ft. tall and 2-3 ft. in diameter. Prefers deep, well-drained soil for best growth. Valuable timber tree. Fall foliage is deep red or orange.

WHITE OAK – 60' high slow growing tree. Grows well on most soils. Acorns great wildlife food, preferred over red oak. Valuable timber tree.

SERVICEBERRY- 8 to 20' high and 4 to 15' wide. Tolerant of most soils and grows well in full sun to part shade. Great pollinator plant and easy to care for.

EUROPEAN LARCH –Grows 75' and 25-30' wide. Full sun with moist well drained soils is best. Its a deciduous conifer which drops its needles in the winter. Golden yellow needles in Fall.

SUGAR MAPLE - Grows 70-100 ft. tall. Prefers well drained soils but will grow on a variety of soils. If open grown it develops a short trunk and a compact globular crown. Fall foliage is a brilliant yellow.

RED MAPLE- 40-60' Fast growing and tolerant of many soils. Full sun is best in well drained moist soils

SYCAMORE - Most massive tree in eastern North America grows to 75-100' with horizontal branching and a rounded habit. Grown around streams and rivers. 3-5 lobed medium to dark green leaves (4-10" wide) are similar to maple.

BLACK WALNUT – Grows over 60 ft. tall. Highly valued for its fine wood and edible nuts. Very site specific, prefers a moist, well-drained soil.

STREAM-CO WILLOW - 10' round dense shrub. This plant is used to stabilize stream banks and in making baskets. Great for wet areas. Does not root spread

SPECIES SOLD ONLY IN PACS

Not all species have descriptions in the Pacs. They are elsewhere in the description pages

BIRD AND BUTTERFLY PAC

BUTTERFLY BUSH - A multi-stemmed shrub growing 5-12 ft. high. Fragrant flowers in July through fall attract butterflies. Tolerates most soils. Should be pruned heavily in spring. Stock sold as a live root.

NINEBARK - A 6-10' tall shrub with white cup shaped flower heads. Drought tolerant with little maintenance. Known for its rich purple foliage. Full sun to partial shade. Adaptable to many soils but best in acidic well drained soils.

NATIVE FLOWERING PAC

BLACK CHOKEBERRY - Part of the Rose family, this shrub prefers moist, well-drained, acidic soils however it will thrive in a wide variety of sites. This is an excellent plant for soil-gripping, rapid establishment, and fall foliage. Grows in full to partial sun. 8' tall and 8' wide.

NANNYBERRY- 15-20' high. Full sun to part shade. Dry, moist well drained soils. Birds love fruit in fall. Attractive 4" white clusters of flowers in the spring.

ORNAMENTAL FLOWERING PAC

LILAC - 3-20' high. 20' wide. Fragrant white, pink, or purple flower clusters. Low maintenance. Makes for good privacy.

ROSE OF SHARON- 8-12' high and 6-10' wide. Full sun to part shade. Large white, red, lavender flowers in late summer to early fall.

PERENNIAL FLOWER PAC

DREAM BABY DAYLILY - Compact but vigorous 18" high daylily has 3.5" light apricot blooms with a purple eye zone and a yellow-green throat. Early to mid-season bloom time.

FRANCES FAY DAYLILY - a 24" tall prolific mid-season bloomer with large & abundant 4" peachy white blossoms.

BLUE KING IRIS - forms an clump of tall deep green grass-like leaves, with royal blue flowers on 24-36" long stems that open above the foliage. Easy to grow and hardy. Clumps return dependably each year with more and more flowers.

SNOW QUEEN IRIS - Regal white flowers with a touch of golden yellow on 30" stems. Blossoms in May and June framed by blue green foliage. Crisp, grassy foliage stays neat looking all season.

STELLA DE ORO - Long season daylily with deep green foliage and a lot of golden-yellow flowers that bloom from late spring to fall. 10-12" high and 12-24" wide.

Nut Tree Pac

PIN OAK - A medium sized red oak that typically grows 50-70' tall with a broad pyramidal crown. Rounded acorns to 1/2" long, are an important source of food for wildlife. Glossy, dark green leaves to 5" long typically have 5 lobes deeply cut close to the midrib. Leaves turn deep red in fall.

SAWTOOTH OAK- Height of 35' in 15 years. May produce nuts in 7-8 years, up to 125 pounds per tree. Grows in medium fertility, slightly acid, clayey, loamy and sandy soils. Fair drought, poor shade tolerance. Food for deer, wild turkey, squirrel and game birds.

POND HABITAT PAC

BUTTONBUSH - A 6-12' wetland shrub. Balls of white flowers resembling pin cushions. 8" long ovate, narrow leaves with glossy upper surface. Shade tolerant, sandy to clay soils. Bees use shrub to make honey and birds and shorebirds consume the seeds.

WILLOW - Black or white willow tree. Best in wet areas with full sun to part shade. Great shade tree. Not good for planting near dwellings

RED OSIER DOGWOOD - 7-9' slender, upright shrub. It has a red stem and white drupe fruit in mid-August. Grows best in wet or swampy conditions. It is also a great structure for holding soil on sloped areas & stream banks.

RIVER BIRCH- Grows well in wet conditions and some dry. Rapid growth and considered a shade and ornamental. Height of 40'-70'. Full sun to partial shade. Great along rivers and streams to help with erosion.

GROUNDCOVERS

LIATRIS SPICATA - Perennial in the sunflower and daisy family. Tall spikes of purple flowers that grow 1' to 5' high. Blooms from July to August. Full sun and well-drained soil but can tolerate some shade. Needs regular watering during first growing season.

PACHYSANDRA - Evergreen ground cover for use in borders, under trees and shrubs and as a lawn substitute in non-traffic areas. Plants 1 foot apart provide dense weed resistant groundcover in 1 to 2 years. Grows in wide range of soils; poor drought tolerance; does not grow well in full sun. Plant rooted cuttings 1 foot apart for rapid growth of dense cover. Clipping in spring stimulates new growth.

DAY LILY - STELLA DE ORO

HOSTA- Perennial plant that root sprouts. Has dark green with irregular cream to white margins. Blooms July -August. Full sun to partial shade

FERN PAC

CINNAMON FERN - 2-5' high non-evergreen fern. First foliage appears as Cinnamon sticks. Later producing deep waxy green leaves. Prefers acid soil, up in late April dormant in September.

CHRISTMAS FERN - Description: 1-2' height full evergreen dark green in color requires shade to partial shade. Prefers neutral to acid soils.

MAIDENHAIR FERN - 18" tall, delicate fern. Lacy, soft leaf grows rapidly. Cannot tolerate dry soils, prefers neutral and moist soils. Dies back in September

NEW YORK FERN - 18' semi-evergreen hardy fern. It likes dryer soils. Yellow-green leaves spread rapidly. This is a good groundcover, requires shade to partial sun

OSTRICH FERN - 3-6' Rich green fern. Light shade to partial sun preference. Applications along ponds and low wet areas ideal

WILDLIFE BERRIES

BLUEBERRY - Blueray (EarlyMid-season) blueberry is a Large sized fruit with a high sugar content. Self-pollinating, but cross pollination produces higher yields. Full sun and acidic soils recommended.

BLACKBERRY - Darrow variety. This plant produces large black fruit that is firm, fleshy, and sweet. Will produce over a long period of time. It is a very hardy and heavy producer. The root systems of this plant have great soil holding capacity.

RASPBERRY - Latham Red variety, mid to late season variety that is winter hardy. Deep red medium consistent berries. Good for freezing and jam

PLANTING SUPPLIES

SLOW RELEASE FERTILIZER TABLETS - These tablets supply the necessary nutrients to seedlings for 2-3 years. Use one per seedling, two per transplant. Tablets are placed in the hole, avoiding root contact, when planting. Tablets are 20-10-5 analysis (20% nitrogen, 10% phosphorous, 5% potassium), weight 10 grams. Can also be used to fertilize existing plantings.

PLANTING BAR - Used for planting seedlings. 39" long bar weighs 10 lbs. T handle, dual footsteps. Triangular, tapering pointed edge. Designed for stony soils.

MIRACLE TUBE TREE SHELTERS - Five 5' high shelters 3 1/4" - 5 1/2" diameter nested together for shipping. Ties for attaching to 6' stake (purchase separately) included. Can increase tree height growth up to 600% the first two years. Protects from deer and other critters.
